Mumbai-based SuperCFO has bagged Finance Monthly Global awards 2015 in the category of Freelance CFO firm of the year. It is the only Indian company to have won an award in the finance space.

The annual Finance Monthly Global Awards, instituted by UK based Finance Monthly magazine, recognise the outstanding qualities of companies and individuals who have delivered the highest quality results within the corporate, financial and legal sectors.

Bhairav Kothari, Managing Director, SuperCFO, said: "Our team is thrilled and immensely proud to have been recognised amongst the best finance firms globally. While SuperCFO has been a pioneer in the concept of Virtual CFO services in India, it has now evolved into a full fledged CFO solutions company, offering various other CFO services namely, Interim CFO services, Special Purpose CFO services and Full Time CFO services. The award is an encouragement for us to scale better heights and continue to focus, offering better services in the finance space."

Mark Palmer, editor-in-chief of the Finance Monthly magazine, said: "The Finance Monthly Global Awards reflect the very best of those professionals working in or with the finance industry today. Each winner has demonstrated excellence and stands out as a first among equals in what is a highly competitive and dynamic sector."
